Dear Mr. Johnson,

On January 31, 2008, we received your application for a right-of-way for a landscape rock quarry on public land in Section 36, T. 11 N., R. 16 W., SLM. This area was previously under permit to Bonneville Stone Quarries and is known as the Green Beetle Mine. On March 18, 2008, we received your processing fees for us to begin work on this surface use permit.

On February 24, 2006, you were granted a right-of-way, serial number UTU-81125, to occupy a 1.1 acre quarry approximately .25 miles northwest of this new proposed location. This permit is scheduled to expire on December 31, 2008.

Since recent field examination of this quarry indicates that you may have exceeded the allowable area within the current permit area, you need to plan on reclaiming this pit prior to our permitting a new pit at the new location. We propose a meeting you or your representative on site as soon as possible to discuss your plans for reclaiming the old quarry as well as your mine plan for the new quarry.

Please contact Mike Nelson at of my staff at (801) 977-4355 to arrange a meeting time. We would also recommend that we have a representative from the Utah Division of Oil, Gas and Mining in attendance at the meeting. Please contact Mr. Lynn Kunzler of that office so that we can both arrange a time to meet with you.

Sincerely,

David H. Murphy
